Overview of Master's of School Administration Program

The Master of Education (M.Ed) in Educational Leadership prepares experienced K-12 teachers to serve as educational leaders. It is designed for candidates who have a baccalaureate K-12 teaching license and at least three years of successful public/private school experience. The Master of Education (M.Ed) in Educational Leadership is designed to prepare experienced K-12 teachers to serve as educational leaders and school administrators. The curriculum in the Educational Leadership program provides 15 semester hours of core courses including Advanced Instructional Technology for the 21st Century, Trends and Issues in Education, Developing Leaders for 21st Century Schools, Methods of Educational Research and Multicultural Education. Within the 22 hours of Specialty Area coursework, candidates receive preparation in the Organizational Management and Legal Issues, Creating a Culture of School Success, Implementing Distributed Leadership, Strategies for Student Learning and Development and Using Data for School Improvement. Three internships allow the candidate to work with his/her supervising principal to gain the skills that are emphasized in co-requisite courses throughout the program of study. School Executive Internship I and II are aligned to specific themes of courses taken by candidates in the first year and into the summer as they complete the required electronic evidences. Activities needed to complete the evidences are carried out in the all three internship experiences. The final School Executive Internship III must be taken at the conclusion of the program and is used to allow candidates to showcase and present one of their evidences and complete required self-assessment and other exit evaluations. The School of Education continues to also offer the 22-hour add-on license in Educational Administration. Currently both the degree and add-on license in Educational Leadership is available through Cohort partnerships with local school districts. Cohorts are usually developed to allow school districts to identify talented teachers with career status who are good candidates for career advancement in the area of educational leadership.

Special Features of the Master's of School Administration Program

The Educational Leadership M.Ed. program at High Point University has several special features which allow prospective candidates many options to complete the required 36 hours of coursework requirements. Applicants who are accepted into the traditional degree program may choose from entry points into the program which include fall, spring, or summer. The add-on license in Educational Administration is also available for candidates who already hold a master's degree and have had a minimum of three years of teaching experience and include fall or spring entry only in order to better preserve the integrity of course sequencing and internship requirements. Several special features of the Educational Leadership program include the option of adding the 22-hour license in Educational Administration for candidates who already hold a master's degree. Both the M.Ed. and add-on programs in Educational Leadership are offered as traditional on-campus programs as well as cohort models that are now delivered in several school districts. This unique program of study includes a blend of on-campus and online core coursework as well as on-site delivery of specialty coursework in educational leadership. Unique to the HPU cohort model is the clustering of interns at specific schools to form professional
learning communities with school principals and graduate faculty in Educational Leadership serving as facilitators. Also unique to the cohort model is a reduction in tuition and fees based on the total number of participants who enroll. With the flexibility and uniqueness of a cohort model, the School of Education has been able to plan with local school administrators to customize the content presented in courses to the districts own strategic goals and objectives. Additionally, executive school leaders within the district also may serve as graduate adjunct faculty and assist in the delivery of the program to the candidates within that school district. In many cases candidates have been selected for participation in the cohort program and have assisted school districts in cultivating their own leaders.

In 2014-2015 the MSA program at High Point University continued to provide instruction through an Executive Cohort delivery model. Candidates enrolled in the MSA program are provided with weekend instruction on the campus of HPU and meet one time each month for the duration of the semester for one full day (8 hours) and one half day (4 hours). Electronic networking is used by faculty through tools such as WebEx to maintain continued interaction and dialogue among cohort members.

This model of instructional delivery accommodates for the demanding role of the current school administrator or district school leader and focuses on the following core set of principles:

- The model provides opportunities for active, student-centered instruction that integrates theory and practice and stimulates continuous reflection.
- Instruction emphasizes problem-based learning; action research; field-based projects using authentic district artifacts and data.
- Substantial use of feedback and assessment by professionals in the field, faculty, and the candidates themselves are key components.
- Practitioners in the field, along with university professors provide problem-based learning opportunities that culminate in the capstone experience.
- Cohort groups of program completers become a peer network of professionals who continue to rely on each other for social and professional support thus strengthening North Carolina public schools.

### Direct and Ongoing Involvement with and Service to Public Schools

The Graduate programs in Educational Leadership have formal Memorandum of Understanding (MOU) with the following school districts:

- Guilford County Schools

Partnering districts provide guest presenters and district leaders who help implement the Program. Many districts provide a representative to serve on Educational Leadership Advisory Board including: Mo Green, this is a continuing partnership which began in Fall of 2012 and continued through the current 2014-15 academic year. Representatives of all districts mentioned, all HPU graduate faculty in the School of Education, all graduate students in Educational Leadership in the School of Education. In Fall 2015, all school districts were visited and currently through the partnership MOU agreements, district office administrators, as well as five N.C. superintendents are serving as Internship coordinators for graduate students in Educational Leadership.
