Located on the slope across the creek behind Blessing and adjacent to the Woodland garden, this garden expands on the original 9/11 memorial daffodil garden started by the SGA in November of 2001. *Hosta* and other companion plants will continue the patriotic theme either in flower or foliage color or name. Massed within this central bed will be a large planting of *Lycoris squamigera* (Resurrection Lily) and other fall blooming bulbs to highlight this area in fall. Throughout the rest of this garden as wide a diversity of bulbs will populate this garden to provide interest year round.
