

The Dr. E. Roy Epperson Garden

Bed Map

Nestled between the Hayworth Fine Arts Center and Congdon Science Hall is a fitting place of honor for the late Dr. Epperson in recognition of his 40 years of service to HPU. Several selections from Epperson's garden help fill the space. Many of his treasured hostas and irises have become the foundation for several other gardens on campus including the new Woodland Hillside Garden as well as the Perennial Garden which houses the majority of his iris collection. As this garden is located in such a well traveled area we have made efforts to fill the garden with an assortment of plants which bring fragrance to the garden at different time of the year.

Epperson Garden Plant List

April 15, 2014

Bed	Botanical name	Common name
EG1	<i>Acanthus</i> 'Summer Beauty'	bear's breech
EG1	<i>Acer palmatum</i> 'Bihou'	gold-bark Japanese maple
EG1	<i>Acorus calamus</i> 'Variegatus'	variegated sweet flag
