

**HIGH POINT UNIVERSITY/NEWS & RECORD POLL
MEMO RELEASE 10/8/2019**

ELEMENTS	DETAILS
Population represented	Adults (people over the age of 18) in North Carolina.
Sample size	1009 adults in North Carolina (828 self-identified registered voters, 628 individuals who said they voted in the 2018 midterm elections)
Mode of data collection	255 live interviewer telephone (Random Digit Dial (RDD) landline and cellular telephones) interviews. 754 online interviews. All interviews conducted in English.
Type of sample (probability/non-probability)	Adults (people over the age of 18) in North Carolina.
Start and end dates of data collection	September 27, 2019 – October 4, 2019
Margin of sampling error for total sample	This is a combined sample of live interviews and online interviews. The online sampling is from a panel of respondents, so their participation does not adhere to usual assumptions associated with random selection. Therefore, it is not appropriate to assign a classical margin of sampling error for the results. In this case, the SRC provides a credibility interval of plus or minus 4 percentage points to account for a traditional 95% confidence interval for the estimates (plus or minus 3.1 percentage points) and a design effect of 1.3 (based on the weighting).
Are the data weighted?	Yes, relative to U.S. Census (2018 American Community Survey and Population Estimates Program) estimates for age, race, education, and gender. The data was also weighted to ensure that the mode of interview (live interviewer or online) was consistent between the weighted and unweighted data.

Survey questions: Below are questions the Survey Research Center fielded for this study. Percentages may not add to 100 because of rounding. Percentages less than one percent are denoted with a *
