

Innovative Assessment Strategies

Corrective Pathways

Feedback-rich assessments encourage continuous improvement, allowing students to refine their skills and knowledge effectively.

Establishing correction pathways ensures every student can meet learning objectives.

Brandon Dragone
Assistant Professor of Economics

Feedback

Students benefit from timely, constructive feedback. If your feedback doesn't change what students do on the next version it was mostly a waste of your time and theirs

Choice

Research shows that assessments providing student choice improve engagement, motivation, and fosters greater ownership of their learning journey

Opportunities

Offering opportunities for revision leads to higher overall achievement rates in assessments.

Integrating these innovative strategies can transform assessment practices, enhancing student engagement, promoting individual growth, and ensuring inclusive learning outcomes for all in higher education.
