

FORENSIC STUDIES

Minor – 20 Credits

Great complementary education for criminal justice majors and students on track to medical school.

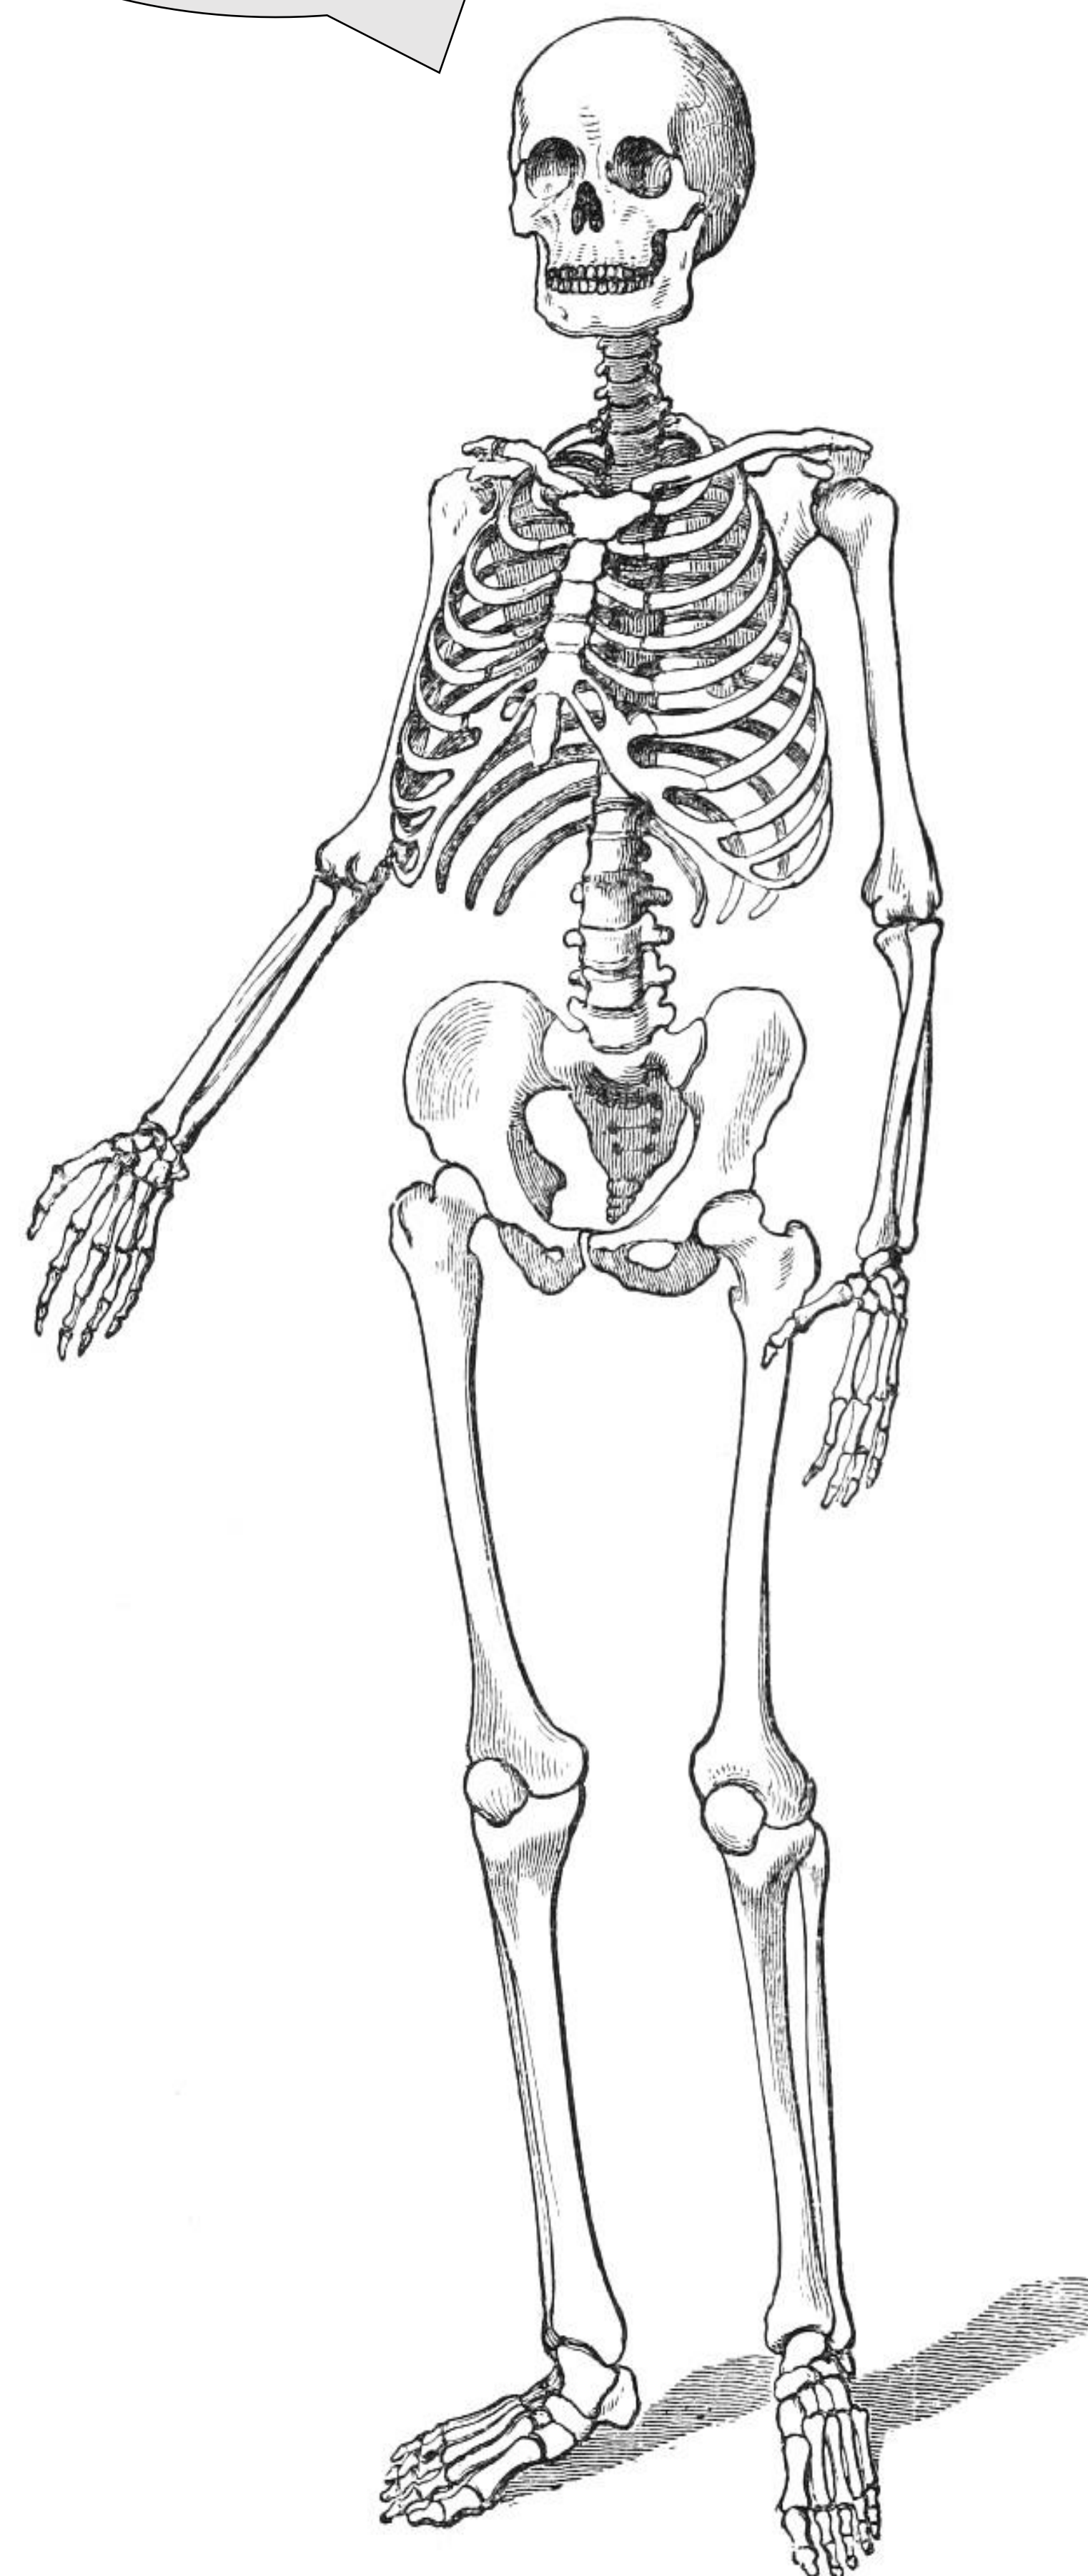

Interested in the human anatomy?

How well do you know your own skeleton?

Can you identify injuries from examining bone?

How many
bones can
you name?

The Forensic Studies minor is a 20-credit minor that benefits students in the social sciences and humanities as well as students in the natural sciences. Classes in this minor go in depth about both human anatomy and forensics in the criminal justice system.

Two tracks are available for this minor and provide an array of knowledge for a variety of future careers.

Some courses in the minor:

Natural Science Track:

BIO 2070/2071 Human Anatomy/Lab

CHM 1616 Forensic Chemistry 1

Social Science Track:

CRJ 3500 Crime Scene Investigation

PSY 3910 Forensic Psychology
