By checking below I am certifying that my department chair (named above) has seen and approved the courses that are included in this proposal.

Yes

Please select the appropriate school overseeing this proposal:

Health Sciences

Does this proposal correspond to a particular term?

Fall 2023

Which category does this change fall under?

- Course description

Changes to course number, name, and/or description

Current Course Number & Name (prefix and number)

Proposed New Course Number & Name

Proposed new description

Brief rationale for change

ATR 2200
Clinical
Observation in
Athletic
Training

Experiential learning course in athletic training. This course requires students to observe healthcare professionals in common athletic training settings. Students can explore the roles, responsibilities, and career options for athletic trainers. This course requires students to obtain a minimum of 50 hours in experiential learning in the assigned athletic training settings.

Proposal to add as an experiential learning course.

Rationale for above changes

C - Small Curricular Revisions : Entry # 2177

This course already requires a minimum of 50 hours of experiential learning in assigned athletic training settings, meeting the requirements for an experiential learning course designation as a one credit course. The course description was edited to reflect the "observational hours" as "experiential learning" to clearly identify the purpose of the course and its objectives.

Does this change affect any other departments, schools, or programs besides your own? If so, please describe your consultation process with affected parties.

Dr. Tarara, Chair of the Department of Exercise Science, was notified of this change for academic advising purposes of students pursuing the 3-2 MSAT track, as the course is required for this set of Exercise Science students.
