Yes

Please select the appropriate school overseeing this proposal:

Natural Sciences

Does this proposal correspond to a particular term?

Fall 2023

Rationale for above changes

We are requesting that students not be allowed to double major in the Behavioral Neuroscience track of the Neuroscience major and Psychology due to the overlap in content and coursework. We are also requesting that students not be allowed to double major in the Neurobiology track of the Neuroscience major and Biology due to the overlap in content and coursework. These restrictions were supposed to be part of the initial revision to the Neuroscience major passed last year and were accidentally left out of the proposal. This will not affect any current students.

Does this change affect any other departments, schools, or programs besides your own? If so, please describe your consultation process with affected parties.

The Psychology and Biology departments were consulted during the revision of the Neuroscience program and both were in agreement to this revision as well this restriction.
