

The Espalier @ The Wanek Center

Bed Map

Dressing up the brick walls located at the back of the Nido R. Qubein School of Communication and the Wanek Center are selections of plants which lend themselves to practice such as ivy, whereby woody plant growth is controlled through pruning and tying of branches in order to maintain the plants in a relatively flat plane. Several different selections of plants have been chosen which lend themselves to this practice such as ivy (*Hedera*), firethorn (*Pyracantha*) and climbing roses. The location at the Wanek Center was further enhanced with several perennials and bulbs to fill in the ground level plantings in fall of 2012.

The Espalier @ the Wanek Center Plant List

April 15, 2014

Bed	Botanical name	Common name
