Cell-phone respondents and home-phone respondents included in this survey, which was conducted 100% by telephone. SurveyUSA interviewed 876 state of Colorado registered voters 10/04/14 through 10/08/14, using Registration Based Sample (aka: Voter List Sample) purchased from Aristotle in Washington DC. To be included in the sample, a voter needed to have voted in both 2010 and 2012, or needed to have newly registered to vote thereafter. Of the 876 registered voters, 800 were determined to be likely to vote on or before 11/04/14. This research was conducted 100% by telephone. Respondents reachable on a home telephone (72% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (28% of likely voters) were contacted by live operators, who hand-dialed the telephone, secured the respondent's cooperation, qualified the respondent, conducted the interview, and remained on the phone until the call was completed.
