

**HIGH POINT UNIVERSITY POLL  
MEMO RELEASE 04/18/2022 (UPDATE)**

<b>ELEMENTS</b>	<b>DETAILS</b>
Population represented	Adults (people over the age of 18) in North Carolina.
Sample size	889 adults in North Carolina (707 individuals who said they are registered to vote)
Mode of data collection	86 live interviewer telephone (Random Digit Dial (RDD) landline and cellular telephones) interviews. 803 online interviews. All interviews conducted in English.
Type of sample (probability/non-probability)	Non-probability, using RDD samples of landline and cellular telephones generated by dynata, as well as respondents from dynata's online panels.
Start and end dates of data collection	March 18 – March 31, 2022
Credibility interval for total sample	Approximately +/-3.5 percentage points. This accounts for a standard margin of sampling error of 3.3 (as if it were a probability sample) and a design effect caused by weighting.
Are the data weighted?	The data is weighted toward population parameters for age, gender, education, race, and ethnicity published by the U.S. Census. The SRC produces weights through an iterative procedure within SPSS. A final step of the weighting ensures that the proportion of weighted online and live interview cases is the same as in the unweighted proportions.
Survey sponsor and funded by	High Point University Survey Research Center, High Point, NC
Survey/Data collection supplier	Interviewers manually dialing remotely through the High Point University Survey Research Center, recording responses in Qualtrics. The physical location of the Center on the High Point University campus. When students are on campus, they staff 42 stations equipped with WinCati computer assisted telephone interviewing systems. Dynata supplied online panel interviews.
